SUMMARY

Frontend Developer with 3+ years of experience building and maintaining web applications from concept to deployment. Known for delivering clean, efficient solutions and collaborating effectively across teams.

EXPERIENCE

FrontendDeveloper

Rheel Estate Limited   **February 2025 - April 2025, Abuja, Nigeria**

- Collaborated with a backend developer and UI/UX designer to build the company's website and admin console.
- Developed 10+ responsive pages using Next.js, TypeScript, Framer Motion, and Tailwind CSS.
- Integrated and managed property data using Axios for 5+ listings and backend resources.
- Built a lightweight backend service using nodemailer, improving communication efficiency by 30%.
- Ensured responsive, user friendly design across 10+ device types following modern best practices.

Frontend Developer

Migho Invest Limited   **June 2024 - September 2024, Lagos, Nigeria**

- Collaborated with a backend developer and UI/UX designer to build Migho Invest Limited, an investment platform using React.js and TailwindCSS, serving users.
- Integrated Axios for API requests, fetching products by category with 20+ product entries and managing POST requests for form submissions.
- Streamlined state management using React props, enabling efficient data handling across 30+ components.
- Utilized Framer Motion to implement smooth scroll animations, improving the visual appeal and user experience of the platform.
- Used version control (Git) for efficient collaboration with the team, tracking changes and maintaining code integrity across 3+ developers.

PROJECT

TaskMaster

Personal Project • task-app-frontend-rho.vercel.app/ • April 2025 - April 2025

- Designed and developed a full-stack task management web application using Next.js, TypeScript, and Framer Motion, achieving a modern, animated UI with a 100% responsive layout across devices.
- Implemented secure user authentication for over 500+ users, including login, signup, password reset, and password change, using JWT tokens and bcrypt-hashed passwords.
- Integrated **MongoDB** to handle and persist more than **10,000+ task records**, supporting efficient data retrieval and scalability.
- Built full task CRUD operations and integrated real-time analytics, increasing user productivity insights by 35% through visual task completion trends.
- Enabled user profile editing and account deletion, with **over 60%** of users updating their personal settings for a personalized experience.
- Utilized Git and GitHub for version control, maintaining consistent deployment pipelines and clean code history.

TechNest – E-commerce Platform

Personal project • technest-two.vercel.app • November 2024 - December 2024

- Designed and implemented a fully responsive e-commerce web platform using React.js and Tailwind CSS, resulting in a 35% faster load time and improved mobile usability across devices.
- Integrated Firebase Firestore for real-time product management, enabling dynamic updates for over 50+ product entries.
- Developed secure user authentication with Firebase Auth, supporting over **100** active users, leading to a 30% increase in returning user sessions within the first 3 months.
- Engineered wishlist and cart functionality using React's `useContext` API, enhancing user convenience and boosting average session duration by 25%.
- Enhanced visual experience by integrating Framer Motion for smooth scroll animations, leading to higher user engagement metrics and reduced bounce rates.

EDUCATION

Bachelor of Engineering in Computer Engineering

Ekiti State University • Ado-Ekiti, Ekiti • 2025

SKILLS

Frontend: HTML5, CSS3, TailwindCSS, JavaScript, TypeScript, React.js, Redux, Next.js

Backend: Node.js, Express.js, MongoDB, Firebase

DevOps & Cloud: GitHub Actions

Testing & APIs: Postman, RESTful APIs, Authentication (OAuth2, JWT)

Tools & Workflow: Git, Command Line, VS Code
